Introduction

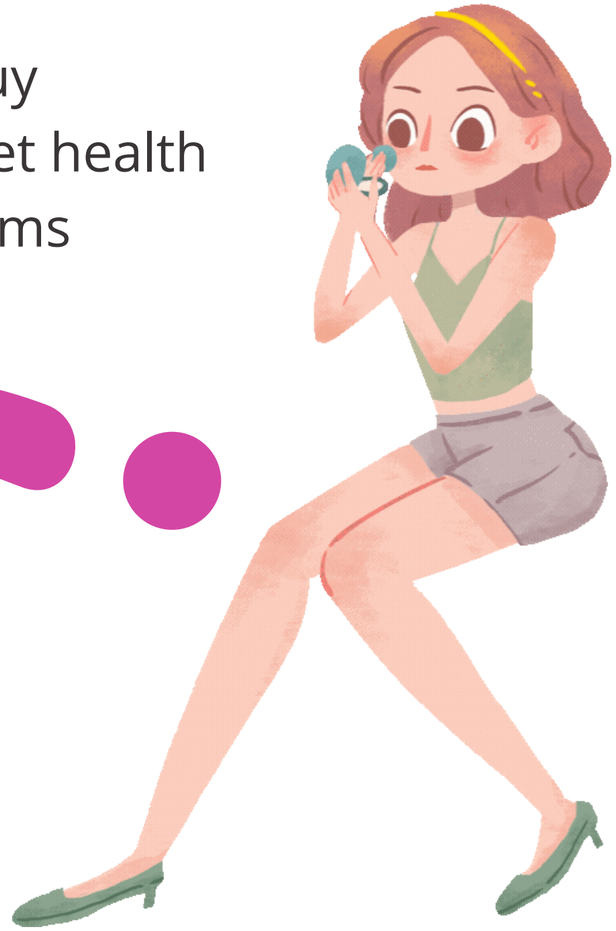
Realistic makeover and virtual makeup application

Virtual try-on

- Foundation shade finder
- Eyeliner
- Lipstick
- Hair cut and Hair Color
- Nail Polish

Problem Identification

- Customers are most concerned with the color displayed on the product
- Time Wasting
- supplying free samples has an impact on their business
- No proper platform to buy cosmetic products and get health tips regarding the problems



Proposed Solution

- Virtual try-on cosmetic products
- Online store
- Identify the problems in users' faces and recommend appropriate items to treat them
- Set a reminder to use the products
- Promoting beauty products

Technologies Used

AR Technology
Augmented Reality

Python
Programming Language

Tensor flow
Libraries for Developing the model

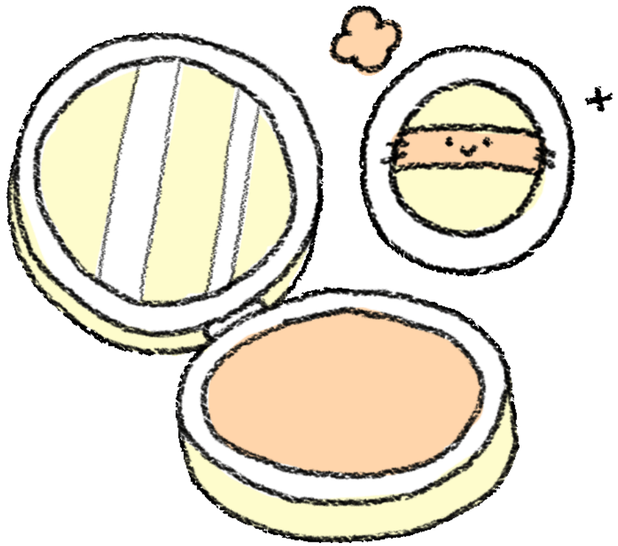
Flutter
Mobile Application Development

Adobe XD
UI Designing and Enhance UX

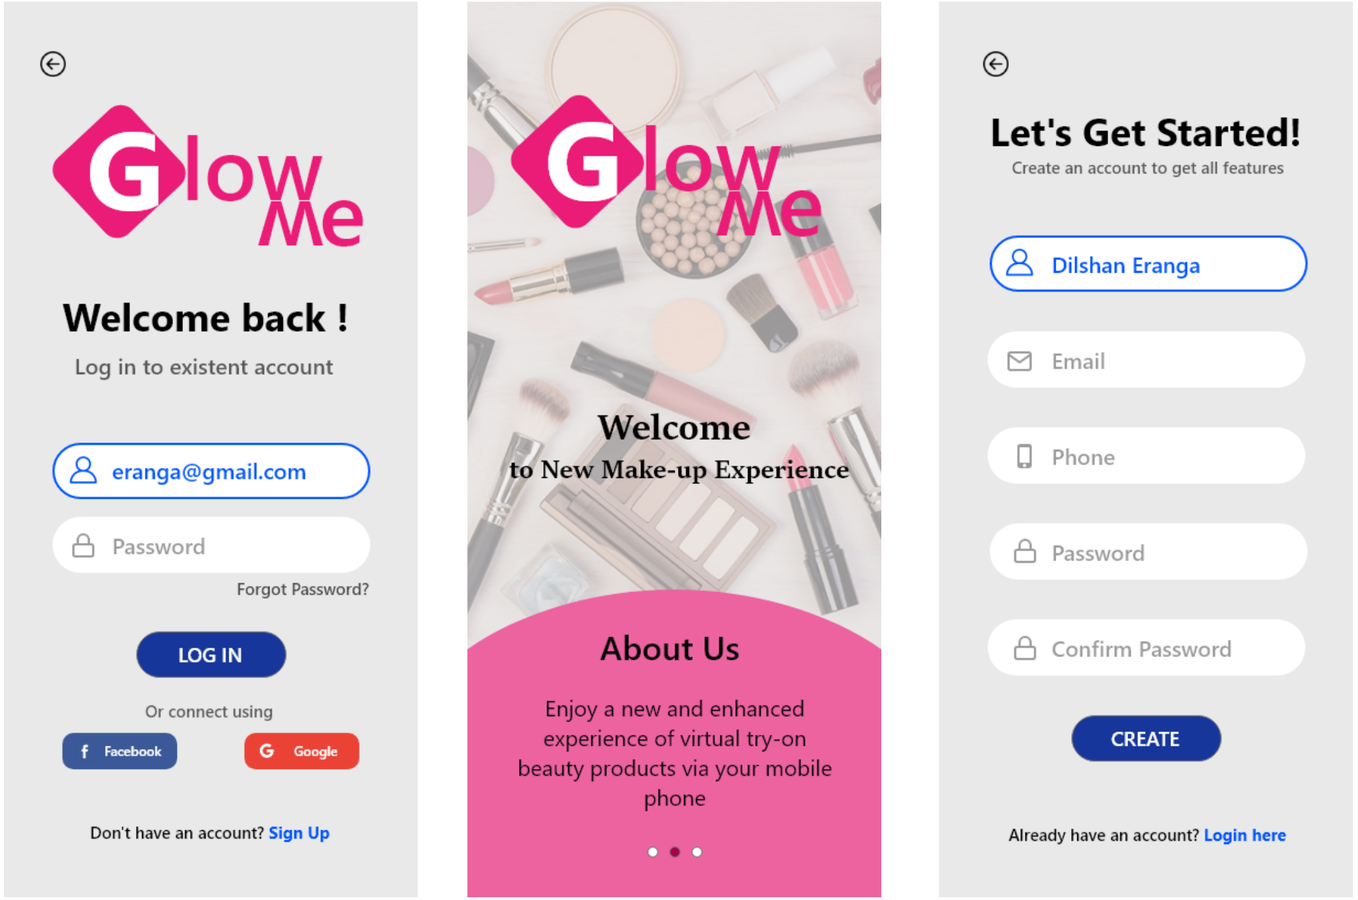
Flask
Web Application Development

Business Model

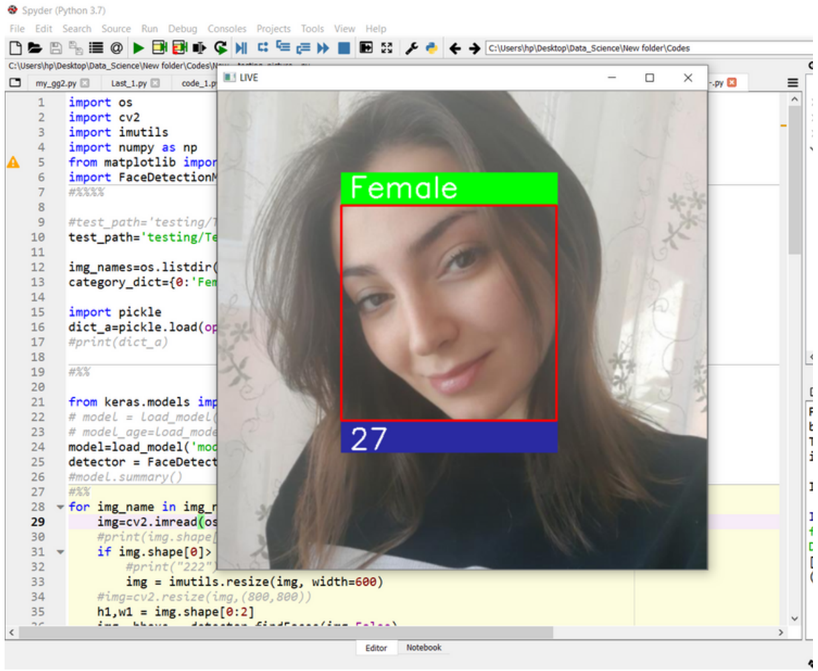
- Selling the cosmetic products through the online store
- Advertising the products in our application
- Introduce Monthly Subscription method



Current Progress



UI Design



Age Gender Prediction

Thank you
